

Floorsafe Everlast Rubber Product For steps, Ramps & Floor areas

FLOORS & RAMPS:

Everlast is the perfect floor covering for any floor area where there is a need to withstand heavy traffic.

Everlast is extremely wear resistant and a perfect floor for sports and fitness facility.

Everlast is highly abrasion resistant, guaranteeing a long life even under extreme conditions.

Everlast meets community demands with the added benefit of noise reduction.

Everlast is manufactured in continuous roll lengths and from recycled rubber crumb, this being recognised as solution to a big problem.

STEPS & STAIRWAYS:

Everlast is ideal for steps & landings because it offers slip resistance under wet or dry conditions, noise reduction and long term wear properties.

Floorsafe International custom makes each tread & landing to the size required with a choice of two nosings.

Everlast has outstanding slip resistance, wet or dry.

Available in three standard colours red, green & black.

Technical Data – Floorsafe Everlast Rubber

Roll width 1.25 metres

Roll length Up to 40 lineal metres

Thickness 5mm and 8mm (various available upon request)

Weight 1015 grams, per mm, per square metre

Density 1015kg/m³

Tensile strength approx. 2.35 N/mm² (DIN 53 571 specimen B)

Tear resistance approx. 15.5 N/mm (DIN 53515 Graves)

Material EPDM and rubber granules, PUR binder

Temperature resistance -40°C to 115°C Installation permanently adhered, subject to site conditions

Slip Resistance Attested to AS/NZS 4586 : 1999, Appendix A,
Appendix C, Appendix D

Fire Indices Attested to AS/NZ 1530.3 : 1999
